

COMMUNITYENERGY®

Sandy Alexander

POWERED BY 100% WIND ENERGY!

Sandy Alexander has purchased enough wind energy to offset 100% of its electric usage for seven years. A total of 115,500 MWh of wind generated electricity will enter the New Jersey and National grids on behalf of Sandy Alexander.

This purchase makes a difference for the environment and promotes our nation's energy independence. The estimated environmental benefit is equivalent to planting about 63,000 acres of trees or not driving over 178 million miles.

Wind energy is clean, safe and pollution-free and is supplied by leading wind energy marketer & developer, Community Energy, Inc.
